<b>TECHNICAL DATA:</b>						
Can be recoated with*	SB-1300, SB-7000	SB-1300, SB-7000	SB-600	SB-3330	SB-5000	SB-4000
VOC (g/L)	82	99	<150	99	50	44
Coverage (ft <sup>2</sup> on pavers)	80 - 120	80 - 120	100 - 200	100-200 (Walls)	100 - 200	100 - 200

\*Recoating should not be carried out over sealer from another company.

**ENHANCING SEALERS** protect masonry applications while improving their appearance with a variety of finishes. These unique formulations allow large particles to stay near the surface, altering the appearance, while smaller particles enter the substrate to bond and protect. These products will not trap efflorescence and can be applied immediately after installation is complete.

**PENETRATING SEALERS** offer the highest level of stain protection while leaving the appearance of the surface unchanged. These formulations penetrate deep to fill voids and prevent water and staining from setting into the material. Like all Surebond products, these sealers will not trap efflorescence and can be applied immediately after installation is complete.
